

Convert the following algorithm into a program and find its time complexity using counter method.

```
Factor(num) {  
  {  
    for (i = 1; i <= num; ++i)  
    {  
      if (num % i == 0)  
      {  
        printf("%d ", i);  
      }  
    }  
  }  
}
```

```
1 #include<stdio.h>
2 int main()
3 {
4     int num;
5     scanf("%d",&num);
6     int count=0;
7     for(int i=1;i<=num;i++){
8         count++;
9         count++;
10        if(num%i==0){
11            count++;
12        }
13    }
14    count++;
15    printf("%d",count);
16    return 0;
17 }
```

	Input	Expected	Got	
✓	12	31	31	✓
✓	25	54	54	✓
✓	4	12	12	✓
